This handsome plaque is hand cast in solid bronze by the age old sandcasting method. The raised polished letters on a dark background create a pleasing contrast. The entire surface is sealed with a special material. The finished plaque measures ten by fifteen inches and weighs about twelve pounds. It will endure for centuries.

Our plaque appears on National Register properties throughout the United States. It is of the highest quality and is appropriate on any property. Your satisfaction is guaranteed.

The plaque may be mounted on masonry or wood with the hardware provided. It may also be embedded in concrete or attached to stone.
